The high quality source of free candidate data for the 2015 General Election

Don't pay for a candidate database sold by a data vendor — it's a waste of money.

At the last election, YourNextMP's volunteer-sourced database of candidates was found to be at least as accurate as one of the most popular commercial datasets.

YourNextMP is the most comprehensive transparently sourced and well-structured database of General Election 2015 candidate data. [Get the data now](#), or [help by contributing new candidate details](#).

- Speech to text and Artificial Intelligence in Welsh
- Interactive Maps
- Android in our languages, with buy-in from device makers and service providers
- That we can all work together to solve this
